

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application.

Listing of Claims:

1. (Currently Amended) A recording and reproducing system comprising:

a record medium holding a data file of storing predetermined data and parameter information used for reproducing said predetermined data;

data file holding position information file recording means of recording data file holding position information, on which indicates a position at which~~where~~ said data file is held, in a data file holding position information file held on said record medium ~~of storing said data file holding position information;~~

parameter information recording means of recording said parameter information in a parameter information file held on said record medium; and

data reproducing means of reproducing the predetermined data stored by said data file by using said data file holding position information and said parameter information which is recorded,

wherein said data file is given unique data file ID by using order in which said parameter information file stores said parameter information.

2. (Currently Amended) The recording and reproducing system according to claim 1, ~~wherein:~~

wherein said record medium holds a plurality of said data files, and

said data file holding position information file stores all the data file holding position information on the positions at which said plurality of data files are held respectively.

3. (Currently Amended) The recording and reproducing system according to ~~claim~~ claim 1, ~~wherein:~~

~~said data file further stores parameter information used for reproducing said predetermined data;~~

~~parameter information recording means of recording said parameter information in a parameter information file held on said record medium of storing said parameter information is further provided; and~~

said data reproducing means reproduces the predetermined data stored by said data file by further using said parameter information which is recorded.

4. (Cancelled).

5. (Currently Amended) The recording and reproducing system according to claim 4claim 1, wherein said data file holding position information on the positions at which said respective data files are held is recorded in said data file holding position information file by using said unique data file IDs which are given.

6. (Currently Amended) A recording and reproducing method comprising:

a data file holding position information file recording step of recording data file holding position information, ~~on which indicates a position at which~~where a data file of storing predetermined data and parameter information used for reproducing said predetermined data is held, in a data file holding position information file held ~~by~~ on a record medium holding said predetermined data file and said data file holding position information file;

parameter information recording step of recording said parameter information in a parameter information file held on said recording medium; and

a data reproducing step of reproducing the predetermined data stored by said data file by using said data file holding position information which is recorded,

wherein said data file is given unique data file ID by using order in which said parameter information file stores said parameter information.

7. (Currently Amended) A program on a computer readable medium, which program of, ~~per recording and reproducing method according to claim 6, causing causes a computer to execute~~act as:

the data file holding position information file recording step of recording data file holding position information, ~~on which indicates~~ a position at ~~which~~ where a data file of storing predetermined data and parameter information used for reproducing said predetermined data is held, in a data file holding position information file held by on a record medium holding said ~~predetermined data file and said data file holding position information file, to act as the parameter information recording step of recording said parameter information in a parameter information file held on said recording medium,~~ and

to act as the data reproducing step of reproducing the predetermined data stored by said data file by using said data file holding position information which is recorded, in the recording and reproducing method according to claim 6.

8. (Currently Amended) A computer readable recording medium processable by a computer and supporting of recording the program according to claim 7.
